<tr>
<td>My duty was to create a sandbox-like application, to testify the result of integrating other teams’ components under the same department as a whole.</td>
<td>I was able to create something that allowed other teams to play with the sandbox with their components.</td>
<td>Yes! Because I finally got touched with industry code.</td>

**Would you recommend this internship to another student? Why or why not?**

Yes, if that was their first internship

**If you could change one thing about your internship experience, what would it be and why?**

Quickly get in touch with other co-workers as soon as possible, to understand the starting point of the project.

**Please provide any additional information regarding your internship that you feel students should know.**

Find a way to sit in the open area of the company, rather than stay in the cubical area.
