

CS 109-WB

FALL 2023 | WEDNESDAYS, 4-5 PM ONLINE
OPEN TO ALL UNIVERSITY COMMUNITY MEMBERS

The Essentials of AI for Life and Society

What is AI, and why should you care?

Artificial Intelligence technologies are affecting our lives, changing the way we do nearly everything – from how we work and learn to how we interact with our friends and move about our cities– because they are increasingly everywhere and increasingly powerful.

The Essentials of AI for Life and Society will cover fundamental concepts for AI literacy, as well as the ethical and societal implications of AI technologies. You will learn general AI literacy, including:

- The types of AI and their applications
- The risks and benefits of various AI technologies
- The societal impacts of AI technologies
- How to tell AI science from science fiction

Only your curiosity and willingness to explore are needed for this class. No prior technical knowledge is necessary.
